3:18:00 PM	Jake Winkler	Public Health, Health Policy and Advocacy	The Airborne Disease Transmission Research Cluster (ADTRC) at UBCO is a multidisciplinary group of researchers tackling the spread of COVID-19 and airborne infectious disease in healthcare facilities. The cluster has three distinct teams that work in close collaboration: the health team,

			the indoor environment team, and the research and development team. Those interested in this FLEX project will join the ADTRC health team and fulfill several different roles related to airborne transmission of COVID-19, public health, policy and advocacy. A thorough literature review on the potential for airborne spread of COVID-19 in healthcare facilities will accompany the assessment and be submitted for publication. The student(s) will help assess/identify high-risk COVID-19 exposure areas, particularly in hospitals and walk-in clinics in the Okanagan. Work completed during this project will be timely in this global pandemic and help advocate for further research on the transmission of airborne diseases and changes to policy in healthcare settings.
