

INFORMATION NOTE: 2018/19 Royalties Income Distribution

PREPARED FOR: FoM Department Heads, School and Centre Directors

ISSUE: **Distribution of royalties income earned by principal investigators**

BACKGROUND:

UBC researchers assign ownership of intellectual property to the University when commercializing research discoveries. Inventors share in returns to the University through royalty and equity payments. UILO monitors license agreements and assures that royalty payments are collected and properly distributed at fiscal year-end.

The royalties are divided 50% to the inventor(s), 25% to the inventor's Faculty, and 25% to the UBC Operating Fund (UBC Central). 100% of the Faculty portion is distributed to the departments. UILO administers the distribution of the inventor(s)'s portion and pays the inventor via payroll or cheque. When there is more than one inventor, the percentage division between them is decided by mutual agreement; typically the share of payments follows the same ratio as the researcher's contribution to the invention.

UILO distributes 25% of royalties to the Faculty (speedchart DHAG). On March 31, 2019, the Dean's Office received \$124,579. The Faculty portion is provided to the inventor's department. The department then decides how the reserve should be distributed. In June 2019, the royalties were distributed to the inventor's departments.

See Appendix A for the distribution of royalties by unit and speedchart.
